

SHELL TONNA OILS S

Machine Tool Table & Slideway Lubricants

Shell Tonna Oils S are special oils designed for the lubrication of oil machine tool slides and tables. They are based on high viscosity index, highly refined mineral oils and contain additives to enhance their "tackiness", anti-wear and "stick-slip" characteristics.

Applications

- Machine tool sideways and tables
- Machine tool bearings, gearboxes
- Machine tool circulatory systems
- Machine tool hydraulic systems

SHELL ENSIS OIL

Shell Ensis rust protective fluids are a proven range of high performance corrosion preventitives to suit the environment your materials have to survive in. So whatever the surface, Shell Ensis provides the answer.

The new Shell Ensis range has been improved by the use of new anti-corrosion additive technology and resistant barrier forming materials. This has resulted in a double action mechanism which provides high performance protection against corrosion.

Shell Cleanforce

Range of Solvent and Aqueous Cleaners.

Shell Cleanforce ES

Emulsifiable solvent cleaner.

Hydrocarbon degreaser for cold cleaning applications such as machines and machines and machine parts can easily washed off with water.

Shell Cleanforce Aqua GP

General purpose water based detergent for factory floors and yards.

Dip tank and ultrasonic part cleaning, machine cleaning.

Inherently biodegradable formulation. Effective at low dilutions.

Shell Cleanforce Aqua TW

Low foam water based cleaner for tunnel and spray wah applications with multi metal metal applicability.
